GIS Day at CSU

Topic: GIS Research Information @ the CSU Libraries
What: Table display and handouts
Contact: Allison Level, Liaison Librarian
        491-3918   Allison.level@colostate.edu

Abstract: The CSU Libraries (CSUL) provide access to several research databases which cover articles about GIS projects, research, trends, and more. Stop by the table to learn more about databases such as: GeoRef, Web of Science, CAB Abstracts and others. The Libraries also have books and online journals covering a myriad of geographic information systems related topics. Take a look at the Map Resources webpage. You will find links to selected government agencies which provide access to GIS data:
